

## Kentucky Data Interoperability System

Partnership of Law Enforcement, Public Agencies, Business and Citizens to promote collaboration, data interoperability and information sharing for:

### Proactive Law Enforcement and Protection of Citizens

#### What we are about:

- **Data Interoperability, Sharing and Collaboration for KY**
  - Evaluating, Deploying and Sharing **Collaborative Technologies and Infrastructure**
  - Capturing and **Re-using “Work In Progress” Data** of Law Enforcement and Public Services (Tow Logs, Persons of Interest, Warnings, Contact Reports, etc.)
  - **Leveraging YOUR INVESTMENT in IT** and Industry Proven Available Technologies and Methods for Collaboration and Interoperability.
- Expanding access and membership **regionally & statewide**
- Link to **national interoperability initiatives**

#### What We Do:

- **Research on interoperability** issues and understand the requirements
- **Research of best practices** in law enforcement and best in class technologies from industry; compare to requirements of each member
- Deployment and Management of a secure **Police Data Interoperability System** for patrol support (hosted by NKY police agency)
- Deploy and Manage **Groupware/Community Network** based on proven commercial technology (use public domain)
- Establish a block of municipal and industry technology buyers so as to influence and **leverage an economy of scale** with technology providers
- Cooperatively **seek federal, state and/or private grants** to pursue better technologies, support compliance with standards, provide training and improve communication infrastructure
- **Link to best practice regional and national initiatives** from public and private sectors (outreach)
  - Other States (South Carolina) **IN PROGRESS**

#### What It Costs:

- **Standard Membership is FREE at this time** or with Voluntary Donation for Public Organizations
  - **SECURE ACCESS ONLY**

Join the KDI System, help to expand participation throughout the state of Kentucky and Beyond with links to regional and national organizations and systems
